

MONROE COUNTY COMMUNITY SCHOOL CORPORATION
BOARD OF SCHOOL TRUSTEES
Regular Meeting, November 3, 2009

FOR INFORMATION: Energy Education Presentation

Background Information:

Energy Education is a company that has partnered with over 900 organizations during the past 23 years to assist them in reducing utility consumption. Their clients have saved valuable financial resources that could then be reallocated to other important programs while also helping preserve natural resources.

Dr. Coopman, Mr. Scherer and Mr. Thrasher met with Energy Education representatives to discuss the services Energy Education can provide as well as the costs and estimated savings associated with the program. Energy Education representatives will be present at the meeting to make a presentation to the School Board.
